Microsoft Office Language Pack 2007 Microsoft Office Multi-Language Pack 2007

Microsoft® Office Language Packs address the needs of multilingual individuals who routinely create or edit documents and presentations in different languages. They enable computers to be shared by speakers of different languages. And they provide the flexibility of switching the entire user experience, including menus, help messages and document proofing tools to any of 37 available languages.

Create, edit, and proof documents in multiple languages

Office Language Pack document proofing tools enable users to proof Office 2007 documents in your chosen language, as well as in selected companion languages.

Document proofing tools include*:

- Spelling checkers
- Grammar and style checkers
- Thesauri
- Hyphenators
- Autocorrect lists
- AutoSummarize capabilities
- Translation dictionaries
- Input Method Editors (IMEs) for East Asian languages

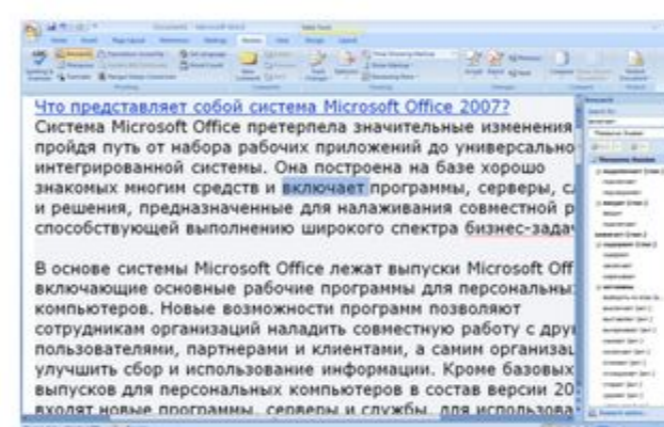

*Not all document proofing tools are available for each language. Consult the 2007 Office Language Packs table below for more details.

Selecting an installed proofing language

Performing a spell check on a German language document

Using the Russian Thesaurus
